Specifications

Capacity:
3,000–4,200 pcs/hr

Product weight:
12–17 g/pc

Dimensions: 1,460 (L) x 1,240 (W) x 1,960 (H) mm

Power: 3.8 kW

Weight (net): 750 kg

* Production capacity is for reference only. It'll change according to different product specifications and recipes. Specifications are subject to change without notice.

One machine does everything from wonton wrapper making, filling, to forming.

After putting prepared dough and filling into the hoppers, setting parameters and pushing the start button, the machine continues to make a dough belt, sheet it, cut it, extrude filling, form wonton, and push final products on the conveyor.

Automated production without compromising the texture and quality of food.

The filling system will not extrude filling excessively so that the texture of filling can be retained. The final products are uniform in weight with an evenly thin wrapper. With a special shaping gripper, the openings can be tightly sealed.

- Limited customization is available to better meet your needs.
- All parts in contact with food are made of food grade stainless steel and acrylic, meeting food safety regulations.
- Easy to disassemble and clean.
